Subject: RE: Response to Comments - Hydrogeological Performance Evaluation Work Plan

Categories: 11-19 to 1-10 2014

Bernie,

The only issue DEQ has with FMC's response to comments on the above noted work plan is with the response to DEQ's specific comment 18. DEQ believes there is ambiguity associated with setting the data loggers whether or not MWH field personnel have successfully performed numerous pump tests with the SOP. It just indicates they are not following the SOP exactly and are familiar enough with the process and the SOP that they read the SOP how they think it should read and not how it is written. Having said this, it is a minor enough issue that DEQ does not wish to push the point further.

Thanks,

Scott A. Miller, P.G.

Attached please find FMC's responses to EPA, DEQ and SBT comments on the Hydrogeological Performance Evaluation Work Plan (HGWP). We've included a description of the changes proposed to the HGWP in response to these comments. Please advise whether we should proceed with preparing a final HGWP or schedule a conference call to discuss.

Barbara,

FMC may have 45 days to complete the response to comments.

Kevin

Subject: Response to Comments - Hydrogeological Performance Evaluation Work Plan

Following up on the discussion in the August monthly report, submitted September 16, 2013, FMC received comments on the Hydrogeological Performance Evaluation Work Plan from EPA on September 13 and IDEQ on September 16. The Monthly report, written after cursory review of those comments, targeted submittal of a response to comments on October, 16, 2013. Based on further review of the comments, FMC will require 45 days to prepare a response to those comments, after which a conference call is probably necessary.

Please approve FMC's request to submit a response to EPA and IDEQ comments on the Hydrogeological Performance Evaluation Work Plan by November 1, 2013.
